## Sabino Creek Software Inc Announces Acquisition of WinMan Lean ERP Software Product from TTW Inc.

Scottsdale, AZ, January 12, 2009 - Sabino Creek Software Inc of Scottsdale Arizona announces the acquisition of the TTW WinMan Version 7 ERP Software product and rights to existing customer base in North America. Sabino Creek has been working very closely with the TTW WinMan product over the past several years and has recently chosen to acquire the rights to the WinMan product to grow market share for its own lean shop floor execution product called *Visual Queue*©.

“Many manufacturers today are wanting to move into a more lean or pull manufacturing environment are finding themselves having to implement traditional push oriented work order driven ERP manufacturing systems into their plant, thus encountering the proverbial square peg in the round hole with problems associated with implementing the wrong software solution for a lean implementation. We have found that working with the WinMan product over the past few years and its Microsoft .NET design and MS SQL database, we have been able to extend the robust lean offerings of the WinMan product to further facilitate the capabilities of Kanban, auto procurement, back flushing, back to back orders and many of the other lean attributes making it the perfect match for integration to our own *Visual Queue*© shop floor lean execution software system, says Greg Clark President of Sabino Creek.”

The acquisition agreement will provide Sabino Creek with access rights to the TTW WinMan ERP software (CRM, manufacturing and financials) and rights to the TTW user base in North America. This acquisition is strategic to Sabino Creek to facilitate expansion of their own manufacturing scheduling products in the northern hemisphere.

Sabino Creeks principles Greg Clark and Jeff Leinwand have been acting as President and Chief Operating Officer of TTW Inc of Reston Virginia since July 1, 2007 and will be resuming day to day management and operations of Sabino Creek Software Inc. on January 1, 2009.

**-MORE-**

**ABOUT TTW INC** - TTW was founded in 1991 and has locations in Reston Virginia and Brighton England. TTW's client base has grown exponentially over the years with client sites ranging from 5 users to over 250 users and from small privately owned businesses to Fortune 100 companies.

TTW's flagship WinMan software product was developed to assist companies in leaning out their enterprise and was one of the first Microsoft Windows based ERP software application available. TTW's niche is in providing a platform for the transition from "Traditional ERP/MRP Manufacturing" to "Lean Manufacturing". For further information on TTW contact them at (703) 738-4268 or visit their web site at [www.winman.com](http://www.winman.com) .
